## JACK DEMPSEY MAY FIGHT NEGRO PUG

New York, April 24.—A possibility that Jack Dempsey and Harry Wills, negro heavyweight contender, may meet in London this summer, loomed large today on the strength of a cablegram from George McDonald, an English promoter.

Dia Dollings, an English fight manager, who is in New York at present, announced the receipt of a cablegram from McDonald, asking if he could get Wills to go to London to box Dempsey. The negro announced that he was "ready to depart by the first boat."

## Man Who Ran Into Morrow's Car Dies

Louisville, Ky., April 24.—Mattie D. Mayes, 35 years old, Middletown automobile salesman, died early today at a hospital, of injuries suffered when his automobile collided with that of Gov. Edwin P. Morrow, near Middletown, March 21.

The governor's car was driven by Henry Bush, Negro chauffeur, with Mrs. Morrow and her sister-in-law, Mrs. B. L. Waddle, Somerset, as passengers.

At the time of the accident it was said that the victim drove from behind a truck which the governor's car was following and that the collision was head on with the governor's car, which was on the proper side of the road. Mr. Mayes was thrown through the windshield onto the hood of the other machine.

## \$100,000 Bequest is Reward of Faithful Nurse

New York.—The faithfulness of Miss Mary E. Murray, a nurse, 101 West Eighty-fifth street, to Mrs. Helen Minturn Post, who died last month at 1449 Lexington avenue was rewarded by a bequest of more than \$100,000, according to the will filed for probate in the Surrogate's Court.

Besides \$15,000 cash and a six-stone diamond ring, Miss Murray inherits two large farms at Lewisboro, N. Y., and the use of the entire house at 1449 Lexington avenue during her life.

The balance of the estate, valued at \$600,000, was left to charitable organizations and relatives.

## TARIFF BILL PROHIBITS AS WELL AS PROTECTS

Washington, April 23.—Characterizing the administration tariff bill as "an economic monstrosity without precedent or prototype," Senator Walsh of Massachusetts, Democratic member of the Senate finance committee, declared in a statement issued tonight that the Republican party has "at last presented to the country a tariff bill that does not merely protect, but in fact prohibits and keeps out foreign goods altogether."

"Protection as a principle has under this bill been completely abandoned," Senator Walsh said. "The underlying purpose of the bill seems to be the handing out of political favors and subsidies to those groups who are able to exercise either sinister political influence upon legislature or pernicious forms of the economic pressure. It is plain that certain schedules were dictated by powerful trusts which hold in the palm of their hands a large part of American business and control the production and the pricing of many of our most essential commodities."

"Other schedules, it is well known, were dictated by vote seeking politicians, who propose to entrench themselves in power by attempting to bestow the blessing of protection upon the farmer with the implied assurance that a mirage of high tariff rates will create 'over-night' millionaire colonies, rivaling Wall Street, in the agricultural sections of the middle and western states."

"In attempting for the first time to establish an effective tariff on agricultural products, the bill undertakes to increase the breadlines of our large cities and multiply poverty in the great industrial centers. Even the food that the children of the crowded tenements so sparsely received is to be taxed, as even the most unfortunates know that half our important export trade is agricultural trade."

## Harding Points to Street Urchine in Plea For Parks

New York, April 23.—A special thought for children of America who have only the streets in which to play is urged by President Harding in a letter to the Playground and Recreation Association of America, indorsing Children's Week, April 24 to May 1, to arouse interest in the movement for more playgrounds and more supervised recreation.

"We are all too sadly familiar," the President wrote, "with the great number of accidents to children playing in the streets, because they have no other place to play."

He cited public statistics showing that more than half of the country's school children were physically defective and that one-third of the young men examined by the army draft boards were rejected because physically below normal.

"I earnestly recommend," the letter added, "particularly during Children's Week, the most generous co-operation with the effort to give the boys and girls a chance to develop into the happy and useful citizens our country needs."

## DECISION IN DUBLIN CASE IS WITHHELD

In the examining trial of R. Bart Dublin, charged with the shooting and killing of A. Wesley Rhodes last April 18th, near Lymanville, County Judge Monroe announced this afternoon, after all the evidence had been given, that he would give his decision in the case tomorrow morning.

There seems to be no doubt but that Dublin, will be held over to await action of the grand jury, but it is not known whether or not he will be released on bond.

Dublin is represented by Robb and Robb, and County Attorney Houston Brooks prosecuted in the examining trial today.

Dublin is pleading self defense on the grounds that Rhodes had a pistol in his pocket when he was searched after being killed. Dublin, in his testimony today, says that Rhodes threatened him.

## ENTIRE COMMUNITY UNDER ARREST IN KY.

Manchester, Ky., April 24.—The arrest of every person over 12 years of age in the Mill Creek neighborhood of Clay County has been ordered by Circuit Judge Hiram J. Johnson, in an effort to break up lawlessness which culminated last week in the ambushing of county officers who went into the district to arrest moonshiners.

Two hundred warrants were issued by Judge Johnson and orders were given to confiscate all high-powered rifles and large caliber pistols.

A squad of 20 men left with 60 warrants and Judge Johnson decided on the wholesale roundup. Officers already are returning with prisoners and reports are to the effect that many of those charged are coming in voluntarily and that others are hurriedly leaving.

The warrants were issued after officers made affidavits that they had reasons to believe that moonshine stills and their furnishings are owned and operated by men who have formed a conspiracy to continue the violation of laws and if necessary to kill officers who attempt to make arrests. They allege that it is this band that ambushed Deputy Sheriff Pete Stivers last week and ran other officers out of the district.

The affidavits further allege that the men in Mill Creek have conspired to kill any person who oppose the commission of crimes or undertakes to have the offenders arrested, and that in furtherance of this conspiracy one or more men already have been shot down and murdered.

## STREET QUESTION WILL BE DECIDED AT MASS MEETING

A mass meeting will be held at the court house Thursday night, April 27th, at 7:30 o'clock for the purpose of deciding whether or not Mayfield will have hard surface streets. The city council started the movement for hard surface streets in Mayfield at the suggestion of citizens, and now there are a number of people objecting to them.

J. E. Robbins addressed the council last night, asking them not to construct hard surface streets, saying that the expense would be too great for the people to bear.

The city council has a right to force the people of Mayfield to lay hard surface streets, but they have announced their intention of not ordering streets unless the people want them. They adopted the following resolution last night:

"WHEREAS, the streets here mentioned are in a very bad state of repair and are largely used by the traveling public and the travel thereon is great;

"Therefore, Be it Resolved by the Board of Council of the City of Mayfield, Kentucky, that a necessity is hereby declared to exist for the improvement and same is hereby ordered to be constructed and reconstructed on the following streets, to-wit:

"South Sixth street beginning at the intersection of said South Sixth street and South street, running thence south to College street; College street, beginning at the intersection of College and South Sixth street and running thence west to intersection of College street and South Seventh street; South Seventh street, beginning at the intersection of South street and South Seventh street and running thence south to College street; West Broadway street, beginning at Twelfth street and running to and including the intersection of North Seventeenth street; East Broadway, beginning at First street and running thence west to and including the intersection of Fifth street; South street, beginning at Fifth street and running thence west to Sixth street, also beginning at the intersection of South street and South Seventh street and running thence west to the Illinois Central railroad track; South Eighth street, beginning at College street and running thence north to Broadway street; West Water street, beginning at South Seventh street and running west to the Illinois Central railroad track; Walnut street, beginning at intersection of South Sixth street and Walnut street and running thence west to the intersection of Walnut and South Ninth street; South Ninth street, beginning at the intersection of South Ninth street and Walnut street and running thence North to Broadway street; North Fifth street, beginning at the intersection of North Fifth street and Broadway street and running thence north to and including the intersection of North Fifth street and Indiana avenue; North Sixth street, beginning at the intersection of Broadway and North Sixth street and running thence north to the intersection of Indiana avenue; North Seventh street, beginning at the intersection of Broadway and North Seventh street and running north to and including the intersection of Indiana avenue; North Eighth street, beginning at the intersection of North Eighth street and Broadway and running thence north to the intersection of Ann street and North Eighth street; North Ninth street, beginning at the intersection of Broadway street and North Ninth street and running thence north to the intersection of North street, beginning at the intersection of Fifth street and running thence west to the intersection of Ninth street.

"BE IT FURTHER RESOLVED, That it is the purpose of the city council to have said streets constructed and reconstructed with concrete, brick, tarvia, Kentucky rock, asphalt or any other paving material as may be determined by the Board of Council as the best and most economical material for the construction thereof, upon bids made therefor, and all to be done in strict accordance with plans, grades, specifications, widths and profiles to be prepared by a competent engineer for such purpose, all of which are adopted as a part of this resolution as fully as if embraced herein or attached hereto.

Section 2. That the cost of the construction of said street or streets or any of them shall be paid for wholly by the property owners abutting or fronting thereon on both sides thereof, to be apportioned to and assessed against the property and property owners abutting thereon on both sides thereof according to the number of front feet abutting thereon.

"BE IT FURTHER RESOLVED, That immediately after the passage and approval of this resolution the city clerk shall cause same to be published in The Mayfield Daily Messenger, a newspaper published in the City of Mayfield, Kentucky."

## British Drys Expect Lady Astor to Lead Campaign in Empire

London, April 24.—The British drys expect that Lady Astor will come back to England primed with enough temperance propaganda from America to start another intensive campaign against booze in the British Isles. At the moment the drys are in such a hopeless position that their fight against John Barleycorn has degenerated from a real battle to a skirmish. So far as can be learned there is no disposition on the part of Piusston Johnson's dry sponsors in America to send him to Great Britain to carry on a hopeless battle. The hope of the British drys has been to have Piusston Johnson here again because of the fact that the country has suffered ever since he came here to intensify the war on booze.

In fact the liquor interests are no longer making a costly fight against the advocates of temperance because they expect little immediate trouble. But they are keeping their weather eye open to prevent any surprise attack.

**A THOUGHT FOR THE DAY.**

The boast of heraldry, the pomp of power,  
And all that beauty, all that wealth e'er gave,  
Await alike the inevitable hour,  
The paths of glory lead but to the grave.

**STIRRING THE WITCH'S CALDRON.**

Senator McCumber's speech in the Senate, introducing the administration tariff bill is a most remarkable exhibit of innocent credulity in men, or of innocent power—we leave it to others to say which.

Evidently, the Senator would have us believe he is a philanthropist and a reformer both rolled in one, working and long-ing and praying for the common people, and their needs. He and his confederates of the Senate have put into the hands of the manufacturers a cudgel whereby the common people, the great tolling mass of producers of raw material and at the same time consumers of the factory output, are to be "slayed alive."

Then he stands up on the floor of the Senate and pleads eloquently with those same "manufacturers" (the captains of whom are there in the lobbies) not to use the cudgel too harshly. He actually has the audacity to believe that we, the people, would accept his assumed philanthropy of purpose, as sincere.

Really the speech is a wonderful expression of confidence in the magnanimity of men in general. We might suppose from reading it that the millennium had come, and that the golden age of brotherhood was at hand.

But in truth, the Senator must know from his own convictions, that the predatory instincts are strong in men, even among the best. The "war-babies" and the sudden rise of hundreds of millionaires must teach him that, if not his common-sense observation. He knows (none better) that if the means of acquiring great wealth is unequivocally placed in

the hands of men, they will use it to their own advantage.

And yet, he stands up to tell the "manufacturers" that they have protected the "infant industries" with a high tariff, and then in suave and honeyed phrases, he begs them not to use the advantage.

After announcing to these petted darlings of the Eastern and Northern states, that they have been bulwarked behind a tariff that practically excludes the foreign market, he says: "The way to reduce the cost of living," for the manufacturer and the wholesaler to be satisfied with most meager profits for a while."

Ye gods—and little fishes! Does anybody believe that Senator McCumber believes, that the manufacturer believes that he means what he says? Nobody ever heard of a manufacturer being satisfied with a "meager profit" when he had it in his power to get a larger one.

Further, he convicts his own intentions, when he says that two-thirds of his people, bread-winners and agriculturists, are not earning sufficient to pay above pre-war prices. At the same time, he knows, that all manufactured stuff, clothing, farm implements and household supplies, are two and three hundred per cent above pre-war prices—and that the Fordney tariff is provided for the express purpose of keeping them there. Still he begs them to remain with tears in his eyes, to assist their helpless and impotent brothers on the outside of the Republican favor—and to make their profits "meager."

The American people are not fools. They know—that the millionaire class along the Atlantic seaboard and in the New England states are a valuable asset in the political battle for office—and that to appease their demands in Congress, is to win their allegiance to the party doing so.

To sum it up—we think the Senator's speech is an insult to the intelligence of the American people.

Superintendent of the United States Capitol building, Elliott Wood, for several days last week received some very mysterious messages over his private radio instrument which is on top of the Capitol. He couldn't translate the message by any code he had ever known. Upon investigation, he found that a woad-packer had tapped his mast full of holes—no doubt sending love-messages to Miss Red-head.

A news item from the Orient reads like this: Sun Yat Sen has abandoned his attack on Gen. Pei-Fu's troops now advancing along the Yang-Tsi-Kiang, against Gen. Chang-Tao-Lin. Such a mix-up of Japanese and Chinese is calculated to disconcert whatever gods there be.

The League of Nations, like Banquo's ghost, just will not

down. Here comes Lary Astor, an old Baltimore girl, and first woman in the Parliament of England, home for a visit. And almost her first public utterance is the argument that the peace of the world is only to be attained by the League of Nations. It is a fact that the women of this country are heartily pledged to the League of Nations—and like any other cause women have ever espoused, sooner or later the United States will sign the covenant. Women do not change their convictions for the sake of expediency—not in a thousand years. On the league of nations they are pledged heart and soul. They will hold on to it as they did to prohibition and woman's suffrage. It doesn't need a prophet to say what the result will be.

**MAYFIELD TESTIMONY**

Home Proof, Here There and Everywhere.

When you see Doan's Kidney Pills recommended in this paper you most always find the recommender a Mayfield resident. It's the same everywhere—in 3,500 towns in the U. S. Fifty thousand people publicly thank Doan's. What other kidney remedy can give this proof of merit, honesty and truth? Home testimony must be true or it could not be published here. Read this Mayfield recommendation. Then insist on having Doan's. You will know what you are getting.

Dr. C. A. Washburn, veterinary, 110 N. 13th St. Mayfield, says: "I certainly have a good word for Doan's Kidney Pills having taken them for backache. I always found them fine for weak kidneys. Doan's are the best medicine I have ever heard of. I would advise anyone to try them for disordered kidneys."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Dr. Washburn had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.—Adv.

**DRESS WARM AND KEEP FEET DRY**

Tells Rheumatism Sufferers to Take Salts and Get Rid of Uric Acid.

Rheumatism is no respecter of age, sex, color or rank. If not the most dangerous of human afflictions it is one of the most painful. Those subject to rheumatism should eat less meat, dress as warmly as possible, avoid any undue exposure and, above all, drink lots of pure water.

Rheumatism is caused by uric acid which is generated in the bowels and absorbed into the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Evans Drug Co.—Adv.

**Doughboys Quit Coblenz.**

Coblenz, April 23.—The second battalion of the United States Sixth Field Artillery, which has been in Europe since 1917 and which went through the war with the First Division, left for home yesterday. The troops are going to Fort Oglethorpe to join their regiment. The battalion has seen more European service than any other unit in the army.

The battalion, the Sixteenth Ordnance Company, an air service detachment and a casual detachment of 200 men will make up the passenger list of the transport Cambrai, which will sail from Antwerp tomorrow.

Thousands of civilians were on hand to bid farewell to the departing troops.

**GET MAN WHO TOOK \$300,000**

Washington, April 24.—A diploma as a graduate safe-blower issued by a school at Los Angeles Cal., was included among other documents found in the treasure trunks of Joseph C. Lauson at Baltimore, following his arrest here on a charge of having committed 200 robberies in the city in the past eighteen months and obtaining loot valued at \$300,000, according to a report from the Baltimore police to the local authorities.

Lauson, who told the police he was sought by the authorities in a number of Middle Western cities, where he was known as the "million-dollar jimmy thief," also had in the trunks, according to the police report, a certificate of membership in a jewelers' association, and correspondence showing that he had sold diamond loot to wholesale "amond" merchants and his own manufacturing jewelers. Among other things reported to have been found in the trunk was a gold badge issued to police officials of the Cleveland police force.

The local police said Lauson told them he had been paying two members of the police force in Baltimore, where he is alleged to have maintained headquarters, large sums of money for protection in disposing of his loot. He refused, they said, to give the names of the policemen.

**Home-Made Set Cheaper.**

Washington, April 24.—Elimination of the storage battery, the most expensive part of the home-made radio receiving set, is now possible, according to the Bureau of Standards of the Department of Commerce.

The receiving sets which are now used in receiving radio signals, music, etc., over distances of perhaps hundreds of miles, require a storage battery to light the filaments of the electron tubes. The battery must be charged from time to time, it is bulky and heavy, the acid in it is a source of danger and damage to the household, and altogether it constitutes a drawback to the general use of radio sets.

The receiving set developed by the Bureau of Standards makes connection with the ordinary electric lamp socket. The set may be used with any type of antenna and by special modification of connection it is even possible to use the electric light wires themselves as the antenna.

The receiving set consists essentially of an amplifier with minor auxiliary parts. It is described in a paper which has been published by the Bureau of Standards about May 1.

**Glass Replaces Gems.**

New York, April 23.—Considerable mystery surrounds the theft of \$29,000 in jewels and the substitution of glass for diamonds in a necklace alleged to have taken place at the summer home of George Quintar Palmer at Port Chester.

Last November Mr. Palmer, a wealthy manufacturer, went to a wall safe in the Port Chester home and found, it is alleged, that a pearl and a poor imitation shell put in place. The same was true of a diamond necklace, said to contain 105 diamonds. Glass shined where diamonds should have glittered.

Palmer called in detectives and a search for the missing gems started. He vouched for the servants, and it was finally found that a necklace had been taken to a jewelry store, whose proprietor said he changed the stones for another jewelry dealer. This man said he was having the job done for still another jeweler.

The third jeweler said he was having the job done for an old customer, an old woman who did not care to have the precious stones, but wanted glass imitations put in their place. Her address was a vacant lot.

Officials of the company that insured the Palmer jewels for \$29,000 could not be reached.
